

## Our open way Your personal way

### Resistance Breeder (m/f/d)

To strengthen our international breeding and R&D team, Aardevo is looking for you to join and work in an international breeders network to develop and implement disease and pest resistance strategies to strengthen our pipeline of innovative potato varieties. We employ a broad range of breeding methodologies and molecular breeding tools to develop this pipeline of potato hybrid varieties. The position is stationed in our headquarters in Nagele, The Netherlands.

#### Your tasks:

- Develop and implement resistance strategies for our diploid hybrid breeding pipeline: identify resistance sources, develop strategies for the introgression of these sources into our germplasm
- Work with the hybrid potato team to determine and develop a strategy for the resistance breeding program for hybrid potato
- Design a program to generate genotypic and phenotypic data to support resistance breeding
- We offer access to state-of-the-art technologies and diverse expertise in breeding, molecular biology, bioinformatics and data management
- You will receive a thorough on-the-job training to grow into your role

#### Your profile:

- Solid and practical bases in phytopathology and plant breeding
- Industry experience is a plus
- Experience with the use of phenotypic and genomic data
- Ability to collaborate with breeders, scientists and technicians from Aardevo and partners
- Excellent team player to work within an international team
- Professional written and verbal communication in English, Dutch would be an asset
