

Meet the global soya community in Vienna

Embracing challenges and opportunities

It is a momentous time for the global soya community: climate change, the drive to implement the Sustainable Development Goals, and renewed focus on plant-based food are forces shaping global soya demand.

Conference topics

The conference will discuss the full scope of soybean innovations in +20 scientific and in several plenary sessions.

The topics are:

1. Soybean genetics, genomics, breeding, and biotechnology
2. Weeds, diseases, pests and their management
3. Agronomy, physiology & agrotechnology
4. Food, feed & nutrition
5. European market issues and policy
6. Soybean in agricultural systems

Good reasons to attend

Join the global soya community | After the pandemic, this is the first chance to reconnect with over 500 conference attendees.

Meet new partners from Europe | Europe has a fast-growing soya production which has already reached 10 million tonnes. Donau Soja, the pan-European soya organisation, is helping to organise the conference and brings the European soy community from France to Ukraine to Vienna.

Vienna is one of the most popular conference destinations worldwide. In addition, you have the chance to book extra technical excursions and tours in Austria and Central Europe.
